Mirage Metrics

Casablanca Metropolitan Area, Morocco

Dear Hiring Manager,

I am excited to apply for the Software Engineer Internship at Mirage Metrics, as advertised on LinkedIn. As a Software Engineering and Distributed Computer Systems student at L'Ecole Normale Supérieure de l'Enseignement Technique de Mohammedia (ENSET), I am eager to contribute my skills to your innovative team.

During my internships at WEM and MOENN Technologies, I gained hands-on experience in web development. At WEM, I built an e-commerce platform using Laravel, integrating product management and secure payment systems. At MOENN Technologies, I implemented FIDO2 passwordless authentication and developed a recipe management application with Next.js and NestJS, ensuring robust and responsive solutions.

Proficient in AngularJS, React.js, Next.js, NestJS, Docker, and Ansible, I also code in JavaScript, TypeScript, and C++. My CCNAv7 and Red Hat System Administration II certifications reflect my commitment to technical excellence. My academic foundation in algorithms and data structures, combined with my collaborative text editor project using CRDTs and YJS, equips me to tackle AI-driven projects, such as prototyping with OpenAI or Claude APIs.

I am confident my technical skills and proactive mindset make me a strong fit for Mirage Metrics. I am eager to learn and contribute to your cutting-edge projects.

Thank you for considering my application. I am available for an interview at your convenience and look forward to discussing my potential contributions.

Sincerely,

Mountassir JERRARI
